Application Data

Method:

Roller or brush.

Theoretical Coverage:

10-12m²/litre.

Dilution:

For best performance, no dilution is necessary.

Surface Preparation:

Substrate should be clean, dry and stable before painting. Treat fungus-growth areas with Berger Anti-Moffa Solution.

Drying Time:

Touch dry - 1 hour.

Overcoating:

6 hours based on normal ambient conditions.

Cleaning:

Wash all equipment immediately with clean water.

Recommended Painting System:

1. On new walls/plaster apply 1 coat Berger Stabilizing Solution.
2. 2 coats Berger Medishield.
For severe hairline cracks, an additional coat of Berger Medishield is highly recommended.
