

Please do bear in mind that our pastels are hand made from a variety of traditional pigments, all of which have their own characteristics. This means that size does fluctuate ever so slightly, and the softness varies between the different colours. We do, of course, keep well within our criteria for the perfect pastel, but if the pastels you've received don't quite live up to your expectations, please get in touch and we'll make sure it's put right.

## ARTIST SETS

The Artist Sets have been collated by our Associate Artists. They are designed to give insight into how the artists work and a head start in forming your own palette.
